## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance.

The prior art does not teach the load carrying vehicle as recited in claims 1 and 20, which include a platform support structure located along a longitudinal centre line of a load deck. The platform support structure defines for each load platform, a plurality of support formations at different levels above the load deck and providing for at least partial support of the load platform at a selected level above a side half of the load deck, as determined by the support formations. This recitation, in combination with the rest of the recited elements, clearly defines over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The closest reading prior art reference is due to Long et al. (7,201,549).

The Long et al. reference disclose a load carrying vehicle having a platform support structure, which is located along a longitudinal center line of a load deck. The platform support structure is not read on read on claim recitations, which requires a plurality of support formations at different levels above the load deck and providing for

at least partial support of the load platform at a selected level above a side half of the load deck, as determined by the support formations.
